DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-31, in Paper No. 5 is acknowledged.
2. Claims 32-96 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to the nonelected Groups, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2814

An anticipation under 35 U.S.C. 102(b) or 102(e) is established when a single prior art reference discloses, either expressly or under principles of inherency, each and every element of a claimed invention. See *RCA Corp. v. Applied Digital Data Systems, Inc.*, 730 F.2d 1440, 221 USPQ 385 (Fed. Cir. 1984).

It is well settled that the law of anticipation does not require that the reference teach what appellant is teaching or has disclosed, but only that the claims on appeal "read on" something disclosed in the reference, i.e., all limitations of the claims are found in the reference. See *Kalman v. Kimberly Clark Corp.*, 713 F.2d 760, 218 USPQ 781 (Fed. Cir. 1083). Moreover, it is not necessary for the applied reference to expressly disclose or describe a particular element or limitation of a rejected claim word for word as in the rejected claim so long as the reference inherently discloses that element or limitation. See, for example, *Standard Havens Products Inc. v. Gencor Industries Inc.*, 953 F.2d 1360, 21 USPQ2d 1321 (Fed. Cir. 1991).

2. Claims 1-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Agarwal et al. (6,297,527).

With respect to claims 1-31, Agarwal et al. (6,297,527) discloses a capacitor 240, 340 having a bottom conducting layer 74, a dielectric layer 72 and an oxygen permeable top conducting layer 70 formed by plasma enhanced annealed layer. The bottom layer is made of a noble metal group, Pt, metal nitride, metal oxide, metal alloy. The dielectric layer is made of dielectric metal oxide material which has a dielectric constant within the claimed range. The top conducting layer is formed of Pt. Or metal oxide. The capacitor is a stack capacitor and a part of DRAM. The capacitor includes a transistor 52. See figures 1-21.
